

Ardian Asani, Aspiring Data Engineer

Prishtina, Kosovo +383 48510204, ardianasani30@gmail.com

PROFESSIONAL SUMMARY

Aspiring Data Engineer with hands-on experience in SQL, Python, PySpark, and backend development through academic and personal projects. Worked on building ETL pipelines, SQL Server Data Warehouses using Medallion Architecture, and data-driven dashboards for reporting and KPI visualization. Interested in databases, modern data platforms, and scalable software solutions, with motivation to further develop practical and analytical skills in Data Engineering and Software Development.

WORK EXPERIENCE

Sep 2023 — Present

DATA ENGINEERING PROJECT DEVELOPER, Personal / Academic Projects

Prishtina, Kosovo

- Built a SQL Server Data Warehouse using Medallion Architecture
- Developed ETL pipelines and Star Schema models
- Developed a Job Platform using FastAPI, React, and MySQL
- Implemented JWT Authentication and backend APIs
- Built a Sales Dashboard for reporting and KPI visualization

EDUCATION

Sep 2023 - Present

COMPUTER SCIENCE AND ENGINEERING, UBT – University for Business and Technology

Prishtina, Kosovo

- Focused on SQL, Python, PySpark, ETL pipelines, backend development, and data analysis through academic projects. Worked on ETL pipelines, backend development, and data analysis projects.

SKILLS

Python	SQL
PySpark	Pandas
SQL Server	MySQL
React	Git/GitHub
Databricks	

COURSES

- SQL for Data Engineering , Data With Baraa
- Python Fundamentals , Data With Baraa
- Intermediate Python and Practical Skills , Coursera / Packt

LANGUAGES

Albanian	Native	English	B2 - Upper intermediate
Serbian	B1 - Intermediate
